Product Description

R&G Radiator Guard SRG0050SS Stainless Steel The R&G Stainless Steel Radiator Guard series is a more rugged version of our existing aluminum radiator guard. Constructed from 1mm stainless steel sheet allows the guard to be incredibly strong and impervious to rust – perfect for bikes and riders who may tackle demanding terrains and conditions. The laser-cut grills are designed for maximum airflow to the radiator so that cooling isn't compromised; the Radiator Guard is as good looking as it is purposeful. The CNC finished guard attaches easily and quickly to the front of the radiator, either by utilizing the existing mounting bolts or cable tied on. **No permanent modifications need to be made to the bike.**
